Tirtodipuran St No.50
Yogyakarta

Opening
Friday, 10 November | 5 PM

Eko Bintang, Comfortable Struggles Fig-02, 2023, Soft pastel and acrylic, 50 x 50 cm

STEM Projects presents *STEM Show 6*, the latest installment in STEM Projects' exhibition series, which will feature the works of five Indonesian artists. At the core of STEM Projects lies an artist-focused approach to creating a platform enabling artists to receive support in the early stages of their careers, encouraging them to explore and create new works.

In this group exhibition, **Ahadi Bintang** delves into urban life themes with a twist of reality using diverse mediums, primarily focusing on airbrush on canvas. **Eko Bintang** immerses his work in lost memories and nostalgic sentiments, conveying his inadequacy in real-life engagements. **Kharisma Adi**, also known as Aris, explores experimental artistic practices using easily accessible natural resources from his region in Pasuruan. His art reflects spiritual reflections, drawing from academic literature, myths, and natural mediums.

Rifkki Arrofik conducts diverse media experiments aligning with his artistic concepts. His work delves into often-overlooked socio-cultural realities, focusing on seemingly trivial aspects. **Salsabila Yasmin** infuses her paintings with metaphoric representations of landscapes as instruments of the mind. Her works blend realistic approaches with abstraction and formal painting aspects, creating compositions that explore the psychological relationship between space and humanity.

STEM Show 6 will be open to the public from 10 November 2023 – 28 January 2024. Exhibition opening hours are Monday – Friday, 12 – 7 PM, and Saturday & Sunday, 12 – 8 PM, with the opening night on Friday, 10 November 2023, 5 PM, at Tirtodipuran Link Building A, Tirtodipuran St No.50, Yogyakarta.

STEM Show

STEM Show is a series of exhibitions where the participating artists are given the opportunity, support, and freedom to showcase their artistic practice. Through this program, we hope to stimulate the artists' development and provide a place where their works can get appreciation from the public.

STEM Projects

STEM Projects was established with the main purpose of discovering and nurturing emerging and under-represented artists.

With an artist-focused approach at our core, we intend to create a platform that enables artists to gain the necessary level of support in the early stage of their careers, while encouraging them to explore their practices and create new works.

Through our programs and activities, STEM places an emphasis on the need for accessibility and engagement between art and people, where we provide the environment that urges the interaction between both; a place for artists to introduce their works to wider audiences.
