STEM

STEM Projects is established with the main purpose of discovering and nurturing emerging and under-represented artists.

With an artist-focused approach at our core, we intend to create a platform that enables artists to gain the necessary level of support in the early stage of their careers, while encouraging them to explore their practices and create new works.

Through our programs and activities, STEM places an emphasis on the need for accessibility and engagement between art and people, where we provide the environment that urges the interaction between both; a place for artists to introduce their works to wider audiences.
