Yogyakarta

Opening
Sunday, 24 September | 3 PM

Chuans Lee, Jati Diri di Ruang Sendat - Blue, 2023, Acrylic on canvas, 100 x 100 cm

STEM Projects presents *STEM Show 5*, a group of ten emerging artists, each representing a diverse range of artistic styles and perspectives, from surrealistic paintings to street art graffiti, depicting surreal representations of life's journey.

In this group exhibition, **Angling** presents the subconscious into the real world, taking the figure of a small child as an image of innocence and purity that reacts to a diverse range of emotions. Meanwhile, **Fauzan** weaves underwater fantasy and vibrant trees into captivating representations of life's journey. **I Wayan Sarcita Yasa** articulates self-reflection through surrealist pop art which takes a unique monochromatic approach, inviting viewers to explore the depths of his creative spirit. Drawing viewers with her inverted and illuminous palette, **Kim Borja** infuses elements from children's stories, with wide-eyed characters expressing melancholy and grief.

Chuanslee uses street art and graffiti to question the meaning of life in his and our own comfort zones. **Oggz Goy**, epitomizes fearlessness in art, exploring spaces to create his own masterpieces. His journey from the streets to the gallery highlights his commitment to leaving a lasting legacy in the art world.

Gula aims to infuse happiness into people's lives through the works presented in this exhibition. In his paintings, **Juju Sant** uses apes to reflect on his resilience and pursuit of fine arts. **Ijal Mariachi** explores the themes of gender, surrealism, and contemporary life through psychedelic pop art, while **John Raymond** adopts an Abstract-Expressionist approach, conveying emotions and thoughts through various media.

STEM Show 5 will be open to the public from 25 September – 12 November 2023. Exhibition opening hours are Monday – Friday, 12 – 7 PM, and Saturday & Sunday, 12 – 8 PM, with the opening night on Sunday, 24 September 2023, 3 PM, at Tirtodipuran Link Building B, Tirtodipuran No.26, Yogyakarta.

STEM Show

STEM Show is a series of exhibitions where the participating artists are given the opportunity, support, and freedom to showcase their artistic practice. Through this program, we hope to stimulate the artists' development and provide a place where their works can get appreciation from the public.

STEM Projects

STEM Projects was established with the main purpose of discovering and nurturing emerging and under-represented artists.

With an artist-focused approach at our core, we intend to create a platform that enables artists to gain the necessary level of support in the early stage of their careers, while encouraging them to explore their practices and create new works.

Through our programs and activities, STEM places an emphasis on the need for accessibility and engagement between art and people, where we provide the environment that urges the interaction between both; a place for artists to introduce their works to wider audiences.
