8 July – 13 August 2023

Galeri R.J. Katamsi, Yogyakarta 4th floor

Opening

Friday, 7 July | 5 PM

I Made Dabi Arnasa, Simulasi Alam Liar II, 2023, Acrylic on canvas, 70 x 120 cm

STEM Projects presents *sowwww*, a group exhibition of 19 young Indonesian artists today. *sowwww* as the title is a combination of a verb and a noun: “sow” and “www”, each of which serves as the main objective and the catalyst that supports the existence of this exhibition. “Sow” represents the gallery’s commitment to discovering, supporting, and promoting new artists. “www”—an abbreviation for the World Wide Web—represents the power of the internet in connecting the artists with the audiences and subsequently, the gallery.

The Internet has made it easier for them to share their works with a global audience and connect with galleries, curators, collectors, and appreciators from around the world. Art institutions such as galleries have also benefited from the internet, where they can use it to discover and scout new artist prospects that have an interesting value—contextually or visually—to showcase for a wider audience.

At the same time, the internet has created new challenges for artists, such as the oversaturation of the art scene that made it multiple times harder for them to stand out and the pressure to create new works that are “unique and never seen before”.

The majority of artists participating in this exhibition “meet” STEM Projects digitally via the internet, where most of them have never collaborated with us before. *sowwww* presents works with diverse themes, issues, and techniques, *sowwww* as an effort to become a platform for participating artists to connect with new audiences.

sowwww will be open to the public from 8 July – 13 August 2023. The exhibition opening hours are Monday – Sunday, 11:00 – 19:00 WIB, with the exhibition opening on Friday, 7 July 2023 at 5 PM at Galeri R.J. Katamsi 4th floor, Yogyakarta.

STEM Projects

STEM Projects is established with the main purpose of discovering and nurturing emerging and under-represented artists.

With an artist-focused approach at our core, we intend to create a platform that enables artists to gain the necessary level of support in the early stage of their careers, while encouraging them to explore their practices and create new works.

Through our programs and activities, STEM places an emphasis on the need for accessibility and engagement between art and people, where we provide the environment that urges the interaction between both; a place for artists to introduce their works to wider audiences.
